Jan, I read the two statements below in the weekly update. It isn't clear when the data will be publicly available. Is it the District's plan to release the validated data this week?

- When laboratory reports become validated, ENVIRON will provide those to the District. The first validated reports are expected the week of July 14th.
- As data validation efforts are completed, ENVIRON will start preparing building-specific reports summarizing inspection observations, sampling locations and results, and conclusions as per our July 3rd MHS Specific Plan. These reports will be posted on the District's website as they are completed with the first report expected by the week of July 21st.
